

2024 WELLNESS PLANS

Our Wellness Plans have been developed to provide you with peace of mind while minimizing the impact on your budget. The plans have been tailored to ensure your horse is receiving the best preventative health care at the most optimal time. Sign up early to take full advantage of the packages and savings throughout the year. Enrolling in a plan is easy and provides bundle savings on the items when they are packaged together.

HOW IT WORKS

- 1. Contact the office to enroll** your horse in the desired package and book the initial appointment. Each package contains all items outlined in the **Core Plan** in addition to what is indicated in each individual plan.
- 2. Indicate any specific health concerns** you may have with your horse when booking the initial appointment and any additional services you may require during this appointment.
- 3. All services that are a part of the plan** (unless previously indicated) must be scheduled during the same appointment. For example, with the **Pleasure Plan**, the vaccines, dental float and fecal egg count must occur during the same appointment to qualify for our wellness plan special pricing.
- 4. A detailed report** will be emailed following the exam.
- 5. All plans include 5% off all Buckeye Nutrition** products and feed supplements for the 2023 year.
- 6. Multiple horse discount applies** for owners with 4 or more horses (additional 10% discount).

- Senior Dentistry including initial sedation
- Sheath Cleaning while under sedation

BENEFITS OF OUR WELLNESS PLANS

SAVE MONEY

Combining all of your horse's routine health procedures into a single plan allows us to work efficiently and cost effectively. We have passed the savings on to you!

STAY ON TOP OF YOUR HORSE'S HEALTH.

The plan is designed to protect your horse from common infectious diseases and detect emerging medical issues before they are serious. If we are routinely evaluating your horse, we are better equipped to pick up on developing issues such as lameness, exercise intolerance or endocrine diseases before the issues become larger, more expensive problems.

DISCUSSING YOUR CONCERNS

You'll have the benefit of discussing any specific concerns, issues or goals regarding your horse during the initial appointment with your veterinarian.

BOOK TODAY!

ADDITIONAL SERVICES

Any of the additional services can be added to your choice of plan for 10% off the regular price.

**shipping to lab not included*

ADDITIONAL INFORMATION:

1. Manure can be dropped off at the clinic prior to your initial appointment for the fecal egg count or please have a fresh sample ready for us at our appointment. We recommend collecting a fresh sample (within 4 hours) by leaving your horse tied up. This will ensure the right sample belongs to the right horse. Samples must be stored in the fridge after 4 hours old.
2. Packages include a single dewormer for the year. The type of dewormer dispensed that is best for your horse will be determined by fecal egg count and deworming consultation.
3. Mileage is not included in the plan and charged in addition to the plan depending on your location.
4. Please notify the attending veterinarian during the appointment if you will be utilizing your emergency fee or lameness discount.
5. We will provide reminders for fall services that are due, so you don't have to remember!
6. Vaccines come with Zoetis Immune Support guarantee which means if your horse contracts a disease covered by the vaccine and the vaccine was administered by your veterinarian, Zoetis will cover diagnostic and treatment cost up to \$10,000.
7. Plans are valid from January 1, 2024 – December 31, 2024
